

The MultiSync® WD551 just got even better!

ENHANCE YOUR HYBRID MEETINGS!

Download the new firmware from [our website](#) and update your WD551 using a USB stick.

VIDEO : NEC WD551 ENHANCED

Upgrade your NEC MultiSync® WD551 Windows Collaboration Display - Now Microsoft Azure certified!

There is a new firmware upgrade bringing major enhancements to your NEC WD551 Collaboration Display. At Sharp/NEC, we are continually improving our products to enhance the user experience and we encourage users to take advantage of this opportunity to make their hybrid meetings even better!

3 REASONS TO UPGRADE YOUR NEC MULTISYNC® WD551 WITH THE LATEST FIRMWARE RELEASE:

Allow users to choose between two different audio modes on first power on.

Select Teams certified or standard mode ensuring volume is optimised during video meetings.

Allow users to choose between two different USB-C configurations.

This new feature allows more flexibility for wider compatibility with mobile devices, and therefore greater reliability when connecting to the WD551 camera.

Addition of Microsoft Azure connectivity for the built-in IoT room sensors.

Together with the latest firmware release, we can now offer an additional API making integration easier. Users can generate useful reports regarding environmental conditions.
